New Officer/Volunteer Orientation

Chair: Tiger Zhou

The CIE/USA-DFW chapter held its first online 2021 Officers / Volunteers Orientation on Saturday, December 12th, 2020. The main goal of the orientation was to introduce CIE's history as well as the chapter's bylaws, policies, ethics to the 2021 officer team and new volunteers. It also presented an opportunity for the officers and volunteers to meet each other and understand each of the individual function's roles and responsibilities.

Our 2021 DFW Chapter President, Dr. Tiger Zhou, kicked off the orientation session and welcomed a diverse volunteer team from many engineering fields. Dr. Faa-Ching Wang, the chapter founder, was invited to present the CIE/USA-DFW chapter's history and vision. Next, CIE advisors Sheana Chen and Grace Tyler gave a brief overview of the chapter's bylaws, policies and ethics using several hypothetical cases as examples to demonstrate the ideas presented. Finally, CIE advisor Claire Jung introduced the mentoring circle program which was designed to provide mentorship to CIE officers and volunteers in career and personal development.

After a short quiz, 2020 President and 2021 Chairman of the Board, Dr. Lun Tsuei gave a review of the 2020 programs and achievements. The last session of the event was to invite each of the new 2021 officers to give a brief self-introduction and explain their roles and responsibilities. A total of thirty CIE officers and volunteers attended this online orientation. Video clips and interactive games were played throughout the whole presentation. It received an excellent poll score of 4.72 out of 5 from the attendees.

CIE/USA Objective
 CIE/USA is a non-profit, political neutral, & US-based organization.
 The Objective of CIE/USA is to promote communication and the interchange of information among engineers and scientists in the various fields of engineering science. *Networking*
 who are interested in the well-being of the Chinese engineering community in the U.S. and abroad: *Forum*

Purpose of Policy Documentation

CIE/USA-DFW founder, Dr. Faa-Ching Wang introduced the chapter history and vision

Advisors Sheana Chen, Grace Tyler presenting CIE ethics and policies with 5 role-playing scenarios

2021-1st Quarter

Student Engineering & Creativity Convention (SECC)

Chairs: Hua Chen and Xincheng Tang

(3/18/2021)

CIE/USA-DFW successfully held the 4th annual SECC on Sunday, March 28th, 2021. This was the first online SECC in order to maintain everyone's health and safety during COVID-19 as well as the first time we co-hosted the event with another non-profit organization, Share and Grow from Oklahoma. Hosting this event online expanded CIE/USA-DFW's impact to students outside the Dallas-Fort Worth Metroplex, including participants from Oklahoma. The SECC is a flagship youth program of CIE/USA-DFW, featuring engineering competitions for students in grades 1-12, two workshops and one Q&A workshop. The goal of the program was to help students to develop their interest in Science, Technology, and Engineering, and to be creative when solving challenges.

In the 2021 SECC program, we developed two projects: the Division A project (Marble Machine) for students 5th grade and under, and the Division B project (Raspberry Pi Plotter Machine) for middle and high school students. For the Division B project, we further expanded the project to encourage the students to be creative and to come up with their own engineering ideas using the Raspberry Pi platform.

The SECC workshop 1 introduced both projects. The theme was "Build the future!". This workshop attracted more than 100 participants and a record number of contest registrants. The SECC competitions attracted 24 elementary school teams for the "Marble Machine" project and 17 middle school/high school teams for the "Raspberry Pi project". Many students and parents emailed the committee and showed their interest in the program. The SECC workshop 2 for Division B project attracted over 10 teams. On the event day, 20 teams joined the Division A project and 11 teams joined the Division B project. Jan Bennard was the event host and had very successful interview sessions. Many students eagerly demonstrated their projects. After the interviews, all the teams presented their projects to the judges. The award ceremony reached its climax when the award winners were announced. CIE/USA-DFW presented 11 trophies and medals to the Division A "Marble Machine" winners and 5 trophies to the Division B "Raspberry Pi" project winners.

The 2021 SECC was chaired by Hua Chen and Xincheng Tang. The Master of Ceremony was Jan Bennard. The program committee and the CIE/USA-DFW would like to express our sincere appreciation to all the volunteers and corporate sponsors – Oncor, Texas Instruments, Cathay Bank Foundation, and ConsulPath – for their contributions to make this event a great success.

Spring Technical Symposium Webinar (5/1/2021)

Chairs: Yanping Chen and Bryan Taylor

The Spring Technical Symposium Webinar was held on Saturday, May 1st, 2021.

The 2021 CIE/USA-DFW Spring Technical Symposium "Resilience and Sustainability for the Future" aimed to present and exchange ideas about the efforts to strengthen the resilience and sustainability to meet the future needs of prosperity. Three scientific and engineering experts from high-tech companies and academic institutes in the DFW Metroplex shared their research, innovations, thoughts, and vision in their respective fields of batteries, power infrastructures, and energy resources.

The first speaker in the technical session was **Sam Wong**, Product Line Manager, Battery Charging Products, Battery Management Solutions, at Texas Instruments. His speech, "Sustainable Power with Energy Harvesting for IoT Applications", discussed that one of the challenges of smart homes or factories is to provide endless power to run IoT nodes. It is cost prohibitive to power them with wired power or battery power which requires routine charging. Energy harvesting that leverages sustainable sources such as solar or ambient light becomes the only viable solution.

The next speaker was **Dr. Mohammad E. Khodayar**, Associate Professor, Electrical and Computer Engineering, at the Southern Methodist University. His speech was "Energy Supply Resilience and Economics: Transition toward Active Distribution Networks and Microgrid Technology". This presentation addressed the benefits, opportunities, and challenges of integrating and operating microgrids in distribution networks.

The third and final speech in the technical session, "Reducing Carbon Footprints Through Innovation in Oil/Gas Industry", was given by **Dr. Allan Zhong**, Distinguished Scientist, at Halliburton. He discussed how the oil/gas industry is helping to combat global warming through transitioning into clean energy and reducing its carbon footprint through innovation. To read more about our speakers, please go to: <https://cie-dfw.org/event/2021-cie-usa-dfw-spring-technical-symposium/>

2021 CIE/USA-DFW Spring Webinar
Resilience and Sustainability for the Future
 May 8th (Saturday)
 Leadership Assessment and Mentoring Program

Chairs: Yanping Chen and Bryan Taylor

The Leadership Assessment Mentoring Program (LAMP) Webinar was held on Saturday, May 8th, 2021.

The LAMP program started with Mr. David Lu, Vice President, Network Systems & Automation, AT&T Labs. His talk “A Journey from Musician to Technology Executive – Unleash Your Full Potential” provided insightful advice tips on how to discover your true self, unleash your full leadership potential, and fulfill your dream.

The next speaker, Mr. Bing Xie, Former Senior Vice President/Executive Officer for Texas Instruments, delivered a talk with the topic of how to “Thrive In Time Of Uncertainty”. He shared how to improve one’s tolerance and thrive amid uncertainty, especially since Covid-19 has introduced a lot of changes to our professional as well as personal lives.

The third speaker, Mr. Alex Machoka, Senior Director Transmission Operations at Oncor, discussed the topic “Inevitability of Change: Intersection of Leadership and Generations in the Workplace”. He shared many practical tips on how to effectively lead multiple generations especially for young leaders leading older employees, who in most cases have more functional experience.

The program continued with a Q&A Panel discussion with the three LAMP speakers as panelists. They addressed many questions submitted online from the audience.

This LAMP webinar was moderated by Chris Koh. The Spring technical symposium webinar and LAMP webinar were chaired by Yanping Chen and Bryan Taylor. The event received excellent feedback from our attendees, and was rated 4.6 out of 5. We would like to thank our volunteers and generous sponsors for this event!

How do you rate this event?

MathComp/MathFun and Parenting Seminar

(6/5/2021)

Chair: Jan Bennard

CIE/USA-DFW successfully held the 32nd annual MathComp/MathFun on Saturday, June 5, 2021. It is CIE/USA-DFW's flagship youth program, featuring a math competition for students from 1st through 8th grade, a parenting seminar, and a math fun fair. This program helps students to discover and develop their interest in Science, Technology, Engineering, and Mathematics (STEM).

This was the second year that the event was held online in order to maintain everyone's health and safety during COVID-19. More than 250 contestants participated in MathComp (math competition), which was held via an online exam tool with each grade level hosted in its own respective sessions. Hosting this event online expanded CIE/USA-DFW's impact to students outside the Dallas-Fort Worth Metroplex, including participants from Oklahoma, Washington, California, Florida, and more. As the contestants took their tests online, the proctors monitored the contestants virtually via web cam. Contestants then participated in MathFun, through the online platform Kahoot. They participated in a series of games and interactive activities designed for students to broaden their critical thinking skills and to learn to apply mathematics to real life. Students also had options to play Jeopardy or a Choose Your Own Adventure game.

In the afternoon, over 230 parents and guests attended a separate parenting seminar and panel discussions. The theme of the parenting seminar was "STEM Education". Opening remarks were given by Tiger Zhou, President of CIE/USA-DFW. Shawn Xiong served as the Master of Ceremony and moderator for this session, with four panelists including: Dr. Jian Shen (Associate Chair of Department of Mathematics, Texas State University), and students Alay Shah, Amy Guan, and Jennifer Xiong. Click [here](#) to read more about our panelists and see their slides. After the speeches, the panel discussion drew many interesting questions from the audience. The topics ranged from how to stimulate students' interests in math to how to balance school and extracurricular activities.

Hong Jiang was the Master of Ceremony for the awards ceremony. CIE presented "Gold" and "Silver" trophies to 50 winners, who were ranked in the top 20% of their grade. In addition, 50 students received honorable mention medals. Congratulations to the award winners! The winner list can be found at the CIE event site [here](#).

MathComp/MathFun 2021 was chaired by Jan Bennard. The program committee and CIE/USA-DFW would like to express our sincere appreciation to all the volunteers and corporate sponsors - Oncor, Texas Instruments, Cathay Bank Foundation, and AoPS Academy for their contributions to make this event a great success!

Youth Speech Workshops and Contest

(6/26/2021)

Chair: Hong Jiang

The Youth English Speech program was hosted by the CIE USA-DFW Chapter and organized by the Texas Dragon Toastmasters Club. It was sponsored by Oncor, Texas Instruments, and Cindy's NY Deli.

The goals of the Youth Speech contest are to stimulate young students' interests in public speaking, and to boost their confidence and competence from the early stage. The Youth English Speech Contest had served the DFW community for over 10 years. Every year it attracts over 100 students from 1st to 12th grade to compete in this great contest.

This year was the first time the Youth English Speech Contest was held online, which made it more convenient for many participants. Contestants from three different time zones participated in the event and the committee was able to overcome large challenges in organizing and running the contest in a new environment.

Ten committee members started preparing for this event in March. They worked numerous evenings and weekends to learn new technologies for holding an online contest. There were two knowledge transfer sessions with previous MathComp/MathFun and Speech Workshop chairs after the committee's kickoff meeting. Together, the committee learned how to use new tools such as Eventbrite, Zoom, Google Sheets, Google Forms, Slack, and Excel.

To keep a fair and high-quality contest:

- We recruited Distinguished Toastmasters and speech contest winners to give tutorial speeches in two workshops. Topics included:
 - How to choose a topic / organize a speech
 - How to use vocal variety
 - Your body talks
 - Simple Power of Gestures
 - Attitude – Demo Speech
 - 8 Student practice speeches
- We added a new topic in the workshops: Judging Criteria. The Chief Judge, Jen Hoch, presented the speech contest judging criteria. The transparency of judging standards not only ensured fairness to all contestants but also gave students and parents detailed quantitative instructions on how to prepare speeches for the contest. This topic received great feedback during the workshops.

- Before the awards ceremony, 13 contestants volunteered to give their contest speeches in front of a Zoom audience. This was an opportunity for them to highlight their speaking skills. It also encouraged and inspired the other participants.
- More than 30 experienced speech judges and contest masters volunteered to help for this event. Many of them had served as judges or contest masters at a variety of levels at Toastmasters speech contests. To help the judges and contest masters prepare for such a large scale online event, the Chief Judge and Contest Master Chairs worked creatively to provide an easy and effective work process for the online contest.
- More than 60 community volunteers registered to support this event. There were two training sessions, two workshop practice sessions, and two rehearsals provided to all volunteers. These sessions guaranteed a smooth event day on Saturday, June 26.

This program attracted close to 700 zoom users in all three events. There were 211 users for Workshop 1 on June 12th; 162 users for Workshop 2 on June 19th; and 322 users for the contest and award ceremony on June 26th.

There were 104 contestants, who were divided into different Zoom breakout rooms based on their grade levels in the 2021 spring semester. Nine breakout rooms ran concurrently for up to 2 hours. After a 40 minute session of judges' debates, a total of 27 trophy winners and 26 honorable mention winners were announced.

This contest was a great experience for all participants, and according to a Zoom poll, 90% of the poll participants would attend future Youth English Speech Contests. It was also a valuable learning process for the committee members, who learned so much about teamwork, leadership, and communication skills. The committee is proud of their contribution to the DFW community.
